Delete Cookies on That Specific Site on Google Chrome

Google and Mozilla both in fact recommend right below the error to "try clearing your cookies." Cookies can sometimes contain faulty data in which could cause the ERR_TOO_MANY_REDIRECTS error. This is one recommendation you can try even if you're encountering the error on a site you don't own.

Due to the fact that cookies retain your "logged in" status on sites and other settings, we recommend simply **deleting the cookie(s) on the site that is having the problem**. This way you won't impact any of your other sessions or websites that you frequently visit.

Follow the steps below to delete a cookie on a specific website in Google Chrome.

Step 1

In Google Chrome click on the three small dots in the upper right-hand corner. Then click on "Settings."

Step 2

Scroll down and click on "Advanced."

____ × × 🏟 Settings → C @ Chrome | chrome://settings ☆ 🖸 🧕 🕲 🕟 🐻 🕑 🗎 🖸 🗄 ■ Settings Q Search settings Google Chrome is your default browser On startup Open the New Tab page \odot Continue where you left off Ο Ο Open a specific page or set of pages Advanced

Chrome advanced settings

Step 3

Then click on "Content settings."

Chrome content settings

Step 4

Click on "Cookies."

Settings	×							-			×

	← Content settings					0					^
	Cookies Allow sites to save and read cookie data					Þ					
	Location Ask before accessing					•					

Chrome cookies

Step 5

Then click on "See all cookies and site data."

Chrome see all cookies

Step 6

Search for the site (domain) where you are encountering

the ERR_TOO_MANY_REDIRECTS error. You can then delete the cookie(s) currently stored on your computer for that domain. Then try visiting the site again.
